Powerfull air filtration system

- **HEPA filter**

  4" deep, medical grade for trapping 99.97% of smoke particles down to 0.3µ.

- **Activated carbon filter**

  Specially blended carbon filter traps up chemicals found in smoke.

  Activated carbon is the only proven adsorbtion media to safely neutralize odors.

- **Pre-filter**

  2" tar-trapping pre-filter which works like a cigarette filter.
  Low cost, easy to change.

Customize your filtration system by using either a 4" HEPA filter and 30 lbs of activated carbon, or 2 carbon filters of 30 lbs each.

*Recommended filter replocement schedule**

Prefilters, every 3 months
HEPA filter, 1-5 yeors
Corbon filter, 6 months to 2 yeors.
